DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Kim (US 5777680) teaches of dividing the part of the current frame into blocks (Kim: Column 6, Lines 43-45); performing a first sub-encoding on a first block or set of blocks (Kim: figure 1, column 6, lines 40-49. Note: first sub-encoding involves the DPCM, MC, and controller); performing a second sub-encoding on the first sub-encoded block or at least one block of the first set of blocks, the second sub-encoding adapting at least one encoding parameter based upon a quantity of the first sub-encoded part of the current frame, the quantity being determined by prediction at least in part from of the frames of the sequence only those frames that are a reference frame (Kim: figure 1, column 6, lines 49-64. Note: second sub-encoding process involves the DCT and Q blocks); and performing the first sub-encoding and the second sub-encoding on another block or set of blocks of the part of the current frame (Kim: figures 1-2. Note: the process is continuous) and determining the time elapsed between the current and reference frame (Kim: column 4, lines 51-60). However, Kim fails to disclose the second sub encoding having a characteristic indicative of an energy content as claimed. Kim further lacks the specifics of the characteristic as claimed. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
